Art Unit: 3652

1. New formal drawings in compliance with 37 CFR 1.121(d) are required in this application because they are "informal" in nature. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Weis (US 2002/0031419).

Note in figures 3 and 8 Weis shows a container handling crane having trolleys 17, 18 riding on laterally spaced upper and lower rails 19, 20, respectively, of horizontal boom 12, such that trolleys pass each other on vertically spaced travel paths even when they are both loaded with a container 1. The boom is supported on wheeled frame 9, 10 having laterally spaced legs the upper ends of which are interconnected by cable means 15 to the boom for horizontal suspension thereof.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Seaver et al (US 731231).

Art Unit: 3652

Although not explicitly disclosed for handling containers, the device of Seaver et al clearly could be used to perform this functional recitation.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hupkes (US 3,881,608).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over any of Weis, Hupkes, or Seaver et al, in view of Albus (US 4,883,184).

Art Unit: 3652

The base references do not show pivotally displaceable spreader means on both trolleys, although Weis and Hupkes do show spreaders for handling containers, while Hupkes additionally shows one (upper) trolley to be pivotal.

Albus shows a handling device on the same type of crane in the same environment (col. 1, lines 20-25), wherein the device is capable of rotation about a vertical axis for better positioning and control of the load.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified any of the base references Weis, Hupkes, or Seaver et al to include a pivotally displaceable load handler on the trolleys, as shown by Albus, as this would allow better positioning and control of the loads.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
